

Feedback for Jee:

- Put the buttons for the pictures on the top left side of the pictures, OR if each picture fits within the screen above the fold, then you can put it below the picture as long as it's visible above the fold.
- Choose between scroll bar for just the text and scrolling the whole page.
- Try using percentage when placing things on the home screen so that everything fits within the screen whatever screen size it is.
- ^ Make the home screen image smaller to fit the screen.
